

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Currently Amended): A polycarbonate resin composition comprising a resin mixture of

component (A) comprising

(A-1) 10 to 100 mass% of an aromatic polycarbonate resin wherein dihydroxybiphenyl is used in an amount of 5 to 50 mol% with respect to the total amount of divalent phenol as a raw material in the formation of the aromatic polycarbonate resin and

(A-2) 90 to 0 mass% of an aromatic polycarbonate resin other than the aromatic polycarbonate resin of component (A-1), and
an amorphous styrene resin (B), in a mass ratio of component (A) to component (B) of 50:50 to 95:5,

talc (C) in an amount of 1 to 20 parts by mass with respect to 100 parts by mass of the sum of component (A) and component (B),

a core-shell elastomer (D) in an amount of 1 to 15 parts by mass with respect to 100 parts by mass of the sum of component (A) and component (B), and

polytetrafluoroethylene (G) in an amount of 0.1 to 2 parts by mass with respect to 100 parts by mass of the sum of component (A) and component (B).

Claim 2 (Currently Amended): The polycarbonate resin composition according to claim 1, wherein the amorphous styrene resin of component (B) is [[a]] at least one copolymer selected from the group consisting of ABS resin (acrylonitrile-butadiene rubber - styrene copolymer), AES resin (acrylonitrile-ethylene propylene rubber - styrene copolymer), AAS resin (acrylonitrile-acrylic rubber - styrene copolymer), MBS resin (methylmethacrylate-butadiene rubber - styrene copolymer), AS resin (acrylonitrile - styrene copolymer) and MS resin (methylmethacrylate - styrene copolymer) of a (poly)styrene that is polymerized in the presence or absence of a rubber polymer and at least one monomer selected from acrylonitrile and methyl methacrylate.

Claim 3 (Previously Presented): The polycarbonate resin composition according to claim 1, wherein the aromatic polycarbonate resin of component (A-2) is an aromatic polycarbonate resin containing polyorganosiloxane.

Claim 4 (Original): The polycarbonate resin composition according to claim 3, wherein the polyorganosiloxane in the aromatic polycarbonate resin containing polyorganosiloxane is polydimethylsiloxane.

Claims 5-6 (Canceled).

Claim 7 (Previously Presented): The polycarbonate resin composition according to claim 1, further comprising at least one kind of component selected from organic alkali metal salts and organic alkaline earth metal salts (E) in an amount of 0.05 to 2 parts by mass with respect to 100 parts by mass of the sum of component (A) and component (B).

Claim 8 (Currently Amended): The polycarbonate resin composition according to claim 7, wherein component (E) is at least one ~~monomer~~ compound selected from alkali metal sulfonate, alkaline earth metal sulfonate, alkali metal polystyrene sulfonate, and alkaline earth metal polystyrene sulfonate.

Claims 9-10 (Canceled).

Claim 11 (Previously Presented): An injection-molded article made of the polycarbonate resin composition according to claim 1.
